- He's just a chill guy who likes Star Trek.
- The papers that you read are carefully picked. Helps you understand behind the scenes of tools that we use such as GitHub.
- Class is easy, has useful content, but not worth taking. Professor Sambasivan does not want to teach and openly admits he is focusing on research and not lecturing. Lectures are very poorly prepared. The class assignments are not hard, but I was not able to find good TA or instructor support when running into issues.
